Money Makers
Senior Capstone Project
Sprint 1

Gjergji Heqimi
Pete Iacona
Eric Le
Cole Pillars
Carl Welland

Project Vision / Scope of Work

➢ Money Makers will be a web application utilizing HTML, CSS, JavaScript, JSON, PHP, and MySQL. It will allow users to watch and track selected stocks and cryptocurrencies. As well as provide buying and selling suggestions to users.

Identified requirements

➢ Twenty Four Hour Stock Market Update via API.
➢ Users will be able to register and login to accounts.
➢ Users can search and add stocks to their 'watch list'
➢ Users can choose from different statistical methods to watch stocks.

Tools, technologies and frameworks

➢ Server - Google Cloud (Ubuntu Server)

➢ Database - MySQL

➢ IDE - Eclipse (PDT) - PHP, JS, CSS, HTML

➢ Framework - Materialize

➢ Continuous Integration - Jenkins

➢ API's - AlphaVantage

Team collaborations methods

➢ Discord
➢ Github
➢ Slack
➢ In-person meetings
➢ Microsoft Project
